

13XPP Hydraulic Multipurpose Power pack

A medium size hydraulic power pack made for extra hard conditions, where there is a need for a power surplus over the 10 HP units or for an output of 20 – 30 l.p.m.

Application

This power pack gives you absolute maximum power to operate tools like:

- Breakers
- Submersible pumps
- Cut-off saws
- Drilling tools
- Core drills
- Impact wrenches and many other tool

Why Hydraulics?

A 10 HP power pack by far outperforms the typical construction compressors with 25 HP engines and thus gets the job done much faster, and because of the smaller engine it provides significant fuel savings.

The 10 HP power pack is also available in a FLEX version with adjustable flow. By means of a lever on the front of the power pack, the flow can be set to 0-30 l.p.m

FURTHER Advantages

- Low investment – only half the price of a compressor
- No road taxes. No expenses for tyres, brakes, couplings, bulbs, etc
- No stops because of freezing in frosty weather You can tow other trailers etc. as the tools are transported inside the van
- ON-OFF valve for easy change of tool EXTREMELY easy to service - direct access to ALL parts
- Few wearing parts/all run in oil ► very cost-saving Very strong steel frame, which also looks good.

Technical Data

- 10 HP Greaves Diesel engine
- Output 13XDP POD: Standard 20 l.p.m./max. 150 bar Also available with 30l.p.m./max. 150 bar
- Output XPP13 FLEX: Adjustable flow 0-30 l.p.m./max. 150 bar
- Weight 115 kg (empty)
- Sound power level measured: 102 dB Noise directives demand max 104dB
