HYDRAULIC ROCK DRILL

Drilling made easy & economical for the first time....

*We have pleasure in introducing the **Hydraulic Rock Drill Model DH-204***

- *Designed for drilling of blast and anchor holes as well as test drilling in Granite, Rock and Concrete*
- *DH-204 is suitable for drilling hole Ø 25 mm – 65 mm.*

The Salient features of this Rock Drill as can be seen from the enclosed catalogue are:

- **Diesel consumption – Just 1 liter per Hour.**
- **Weight – 20 Kgs.**
- **Four Settings for Blow frequency & rotation – Drilling can be adjusted to suit the type of rock.**
- **On first position, it can work as a light duty breaker.**
- **Built-in Compressor for flushing out debris – a Distinct Advantage.**

A Portable and light weight Hydraulic Power Pack with the option of Diesel/Petrol Engine powers this Equipment. The entire system can be carried to difficult sites that are inaccessible for heavy Compressors.
